PREFACE ..... v

LIST OF TABLES, THIRD QUARTER 1984

Table I — Total Wells Drilled in the United States, July—September, 1984 ..... 2

Table II — Total Exploratory Wells Drilled in the United States, July—September, 1984 ..... 4

Table III — Development Wells Drilled in the United States, July—September, 1984 ..... 6

Table IV-A — Exploratory Wells Completed as Multiple Completions in the United States, July—September, 1984 ..... 8

Table IV-B — Development Wells Completed as Multiple Completions in the United States, July—September, 1984 ..... 8

Table V-A — Wells Drilled in U.S. By Depth Intervals: Total Wells and Exploratory Wells, July—September, 1984 ..... 10

Table V-B — Wells Drilled in U.S. By Depth Intervals: Total Onshore Wells and Total Offshore Wells, July—September, 1984 ..... 11

LIST OF TABLES, JANUARY—SEPTEMBER, 1984

Table I — Total Wells Drilled in the United States, January—September, 1984 ..... 14

Table II — Total Exploratory Wells Drilled in the United States, January—September, 1984 ..... 16

Table III — Development Wells Drilled in the United States, January—September, 1984 ..... 18

Table IV-A — Exploratory Wells Completed as Multiple Completions in the United States, January—September, 1984 ..... 20

Table IV-B — Development Wells Completed as Multiple Completions in the United States, January—September, 1984 ..... 20

Table V-A — Wells Drilled in U.S. By Depth Intervals: Total Wells and Exploratory Wells, January—September, 1984 ..... 22

Table V-B — Wells Drilled in U.S. By Depth Intervals: Total Onshore Wells and Total Offshore Wells, January—September, 1984 ..... 23

Appendix A: Source Agencies for Drilling Statistics ..... 27

Appendix B: AAPG-CSD District Chairman ..... 31

## PREFACE

In 1966, the American Association of Petroleum Geologists (AAPG) expanded its statistical program to include development drilling as well as exploratory drilling. Drilling data collected by the AAPG for wells drilled in 1966 were published monthly by *The Oil and Gas Journal,* and annual summaries were published by the AAPG.

During the period 1967-1969, the AAPG continued to compile statistics for all wells drilled in the U.S. These data were published by the API in the *Quarterly Review of Drilling Statistics* (QRD), and annual summaries were published in the AAPG *Bulletin*.

As of January 1, 1970 the API assumed responsibility for the collection, compilation, tabulation, and publication of basic drilling statistics for the United States. Appendix A in this issue of the QRD shows the companies and agencies that currently serve as API respondents.

The procedures used by the API are essentially the same as those that were used by the AAPG for the years 1966-1969. An individual well ticket is prepared by an API respondent for each completed well. A copy of each ticket is transmitted to the API and used for compiling a master file of drilling statistics. This file is then used to prepare quarterly reports. The number of wells included in any particular report represents those wells which have been reported as completed, and processed by the API within the designated report period.

A copy of each individual well ticket is also transmitted to the Committee on Statistics of Drilling (CSD) of the American Association of Petroleum Geologists which reviews all well classifications reported to the API, and classifies all exploratory wells in accordance with guidelines originally developed by Dr. F. H. Lahee and used by CSD members for more than twenty years. The names of the AAPG-CSD District Chairmen that are currently participating in this effort are shown in Appendix B.

Quarterly reports generally reflect well classifications as reported to the API; however, revisions of well classifications received from the AAPG-CSD are recorded in the master file where they override initial API classifications. Each quarterly report reflects CSD revisions received and processed by the time the report is prepared. Cumulative data reflect revisions applicable to earlier periods falling within a calendar year. Consequently, the sums of the data for individual quarters will not necessarily agree with cumulative data shown in reports for the second, third, and fourth quarters in the current year. The annual summaries of drilling statistics, included in fourth quarter reports, will reflect all CSD revisions applicable to the calendar year.

It also should be noted that the data contained in this report are for completed wells reported to the API during the current quarterly time period. These should not be regarded as wells drilled during this interim. Because of the differences in definitions and timing, and the inherent time-lag in reporting completions, well completions will not track the rotary rig count on a concurrent basis.

Beginning with the first quarter 1980 issue of the QRD, prior-year statistics may not agree with previously published data due to revisions made during the previous year. However, these data are final and the sums of the four quarters will agree with the previous year's annual totals.

In the offshore regions, it is often deemed economically desirable to plug discovery wells drilled with mobile units and to subsequently drill development wells from a fixed platform. Under these circumstances, the actual discovery wells are counted as dry holes since the wells were plugged and abandoned. Therefore, caution should be exercised in utilizing data on offshore exploratory wells (Tables II and IV-A quarterly and Table VI annually) to determine the number of newly discovered fields.

Definitions used for the compilation of drilling statistics may be found in API Technical Report No. 1, "Standard Definitions for Petroleum Statistics," Third Edition, 1981. Users of drilling statistics may also be interestd in the publication entitled "Instructions for Completing Individual Well Tickets for U.S. Drilling Statistics," second Edition, January 1, 1972. The publications are available from the American Petroleum Institute in Washington, D.C.

Additional descriptive information as well as maps outlining the various state and federal offshore areas is published in API Bulletin D12A, "The API Well Number and Standard State and County Numeric Codes including Offshore Waters, issued May 1982. This publication is available from the API Production Department, 211 North Ervay, Suite 1700, Dallas, Texas 75201.

Washington, D.C.

1. DATA ARE PRELIMINARY AND SUBJECT TO POSSIBLE FURTHER REVISION.

2. INCLUDES MULTIPLE COMPLETION WELLS WHICH PRODUCE GAS FROM ONE OR MORE ZONES BUT OIL FROM AT LEAST ONE ZONE. A MULTIPLE COMPLETION WELL IS COUNTED AS ONE WELL (SEE TABLES IV-A AND IV-B FOR DETAIL ON MULITPLE COMPLETION WELLS.)

3. INCLUDES MULTIPLE COMPLETION WELLS WHICH PRODUCE GAS FROM ALL ZONES. A MULTIPLE COMPLETION WELL IS COUNTED AS ONE WELL. GAS WELLS ALSO INCLUDE SO-CALLED CONDENSATE WELLS. (SEE TABLES IV-A AND IV-B FOR DETAIL ON MULTIPLE COMPLETION WELLS.)

1. DATA ARE PRELIMINARY AND SUBJECT TO POSSIBLE FURTHER REVISION.

2. INCLUDES MULTIPLE COMPLETION WELLS WHICH PRODUCE GAS FROM ONE OR MORE ZONES BUT OIL FROM AT LEAST ONE ZONE. A MULTIPLE COMPLETION WELL IS COUNTED AS ONE WELL (SEE TABLE IV-A FOR DETAIL ON MULITPLE COMPLETION WELLS.)

3. INCLUDES MULTIPLE COMPLETION WELLS WHICH PRODUCE GAS FROM ALL ZONES. A MULTIPLE COMPLETION WELL IS COUNTED AS ONE WELL. GAS WELLS ALSO INCLUDE SO-CALLED CONDENSATE WELLS. (SEE TABLE IV-A FOR DETAIL ON MULTIPLE COMPLETION WELLS.)

1. DATA ARE PRELIMINARY AND SUBJECT TO POSSIBLE FURTHER REVISION.

2. DOES NOT INCLUDE STRATIGRAPHIC AND CORE TESTS OR SERVICE WELLS.

3. WELLS ARE CLASSIFIED BY DEPTH INTERVALS ON THE BASIS OF THE DEEPEST TOTAL DEPTH REPORTED FOR EACH WELL REGARDLESS OF THE TOTAL AMOUNT OF FOOTAGE DRILLED. FOR THE MAJORITY OF WELLS REPORTED, THE DEEPEST TOTAL DEPTH AND THE TOTAL FOOTAGE DRILLED ARE EQUAL. HOWEVER, FOR OLD WELLS DRILLED DEEPER AND FOR NEW WELLS SIDETRACKED OUT OF AN ORIGINAL HOLE TO A NEW BOTTOM-HOLE LOCATION, THE TOTAL FOOTAGE DRILLED WILL BE LESS THAN THE DEEPEST TOTAL DEPTH.

1. DATA ARE PRELIMINARY AND SUBJECT TO POSSIBLE FURTHER REVISION.

2. INCLUDES MULTIPLE COMPLETION WELLS WHICH PRODUCE GAS FROM ONE OR MORE ZONES BUT OIL FROM AT LEAST ONE ZONE. A MULTIPLE COMPLETION WELL IS COUNTED AS ONE WELL (SEE TABLES IV-A AND IV-B FOR DETAIL ON MULITPLE COMPLETION WELLS.)

3. INCLUDES MULTIPLE COMPLETION WELLS WHICH PRODUCE GAS FROM ALL ZONES. A MULTIPLE COMPLETION WELL IS COUNTED AS ONE WELL. GAS WELLS ALSO INCLUDE SO-CALLED CONDENSATE WELLS. (SEE TABLES IV-A AND IV-B FOR DETAIL ON MULTIPLE COMPLETION WELLS.)

1. DATA ARE PRELIMINARY AND SUBJECT TO POSSIBLE FURTHER REVISION.

2. INCLUDES MULTIPLE COMPLETION WELLS WHICH PRODUCE GAS FROM ONE OR MORE ZONES BUT OIL FROM AT LEAST ONE ZONE. A MULTIPLE COMPLETION WELL IS COUNTED AS ONE WELL (SEE TABLE IV-A FOR DETAIL ON MULITPLE COMPLETION WELLS.)

3. INCLUDES MULTIPLE COMPLETION WELLS WHICH PRODUCE GAS FROM ALL ZONES. A MULTIPLE COMPLETION WELL IS COUNTED AS ONE WELL. GAS WELLS ALSO INCLUDE SO-CALLED CONDENSATE WELLS. (SEE TABLE IV-A FOR DETAIL ON MULTIPLE COMPLETION WELLS.)

1. DATA ARE PRELIMINARY AND SUBJECT TO POSSIBLE FURTHER REVISION.

2. DOES NOT INCLUDE STRATIGRAPHIC AND CORE TESTS OR SERVICE WELLS.

3. WELLS ARE CLASSIFIED BY DEPTH INTERVALS ON THE BASIS OF THE DEEPEST TOTAL DEPTH REPORTED FOR EACH WELL REGARDLESS OF THE TOTAL AMOUNT OF FOOTAGE DRILLED. FOR THE MAJORITY OF WELLS REPORTED, THE DEEPEST TOTAL DEPTH AND THE TOTAL FOOTAGE DRILLED ARE EQUAL. HOWEVER, FOR OLD WELLS DRILLED DEEPER AND FOR NEW WELLS SIDETRACKED OUT OF AN ORIGINAL HOLE TO A NEW BOTTOM-HOLE LOCATION, THE TOTAL FOOTAGE DRILLED WILL BE LESS THAN THE DEEPEST TOTAL DEPTH.

Appendix B: AAPG-CSD District Chairmen ..... 31

Appendix C: Suspense Well Report ..... 39

## PREFACE

In 1966, the American Association of Petroleum Geologists (AAPG) expanded its statistical program to include development drilling as well as exploratory drilling. Drilling data collected by the AAPG for wells drilled in 1966 were published monthly by *The Oil and Gas Journal,* and annual summaries were published by the AAPG.

During the period 1967-1969, the AAPG continued to compile statistics for all wells drilled in the U.S. These data were published by the API in the *Quarterly Review of Drilling Statistics* (QRD), and annual summaries were published in the AAPG *Bulletin*.

As of January 1, 1970 the API assumed responsibility for the collection, compilation, tabulation, and publication of basic drilling statistics for the United States. Appendix A in this issue of the QRD shows the companies and agencies that currently serve as API respondents.

The procedures used by the API are essentially the same as those that were used by the AAPG for the years 1966-1969. An individual well ticket is prepared by an API respondent for each completed well. A copy of each ticket is transmitted to the API and used for compiling a master file of drilling statistics. This file is then used to prepare quarterly reports. The number of wells included in any particular report represents those wells which have been reported as completed, and processed by the API within the designated report period.

A copy of each individual well ticket is also transmitted to the Committee on Statistics of Drilling (CSD) of the American Association of Petroleum Geologists which reviews all well classifications reported to the API, and classifies all exploratory wells in accordance with guidelines originally developed by Dr. F. H. Lahee and used by CSD members for more than twenty years. The names of the AAPG-CSD District Chairmen that are currently participating in this effort are shown in Appendix B.

Quarterly reports generally reflect well classifications as reported to the API; however, revisions of well classifications received from the AAPG-CSD are recorded in the master file where they override initial API classifications. Each quarterly report reflects CSD revisions received and processed by the time the report is prepared. Cumulative data reflect revisions applicable to earlier periods falling within a calendar year. Consequently, the sums of the data for individual quarters will not necessarily agree with cumulative data shown in reports for the second, third, and fourth quarters in the current year. The annual summaries of drilling statistics, included in fourth quarter reports, will reflect all CSD revisions applicable to the calendar year.

It also should be noted that the data contained in this report are for completed wells reported to the API during the current quarterly time period. These should not be regarded as wells drilled during this interim. Because of the differences in definitions and timing, and the inherent time-lag in reporting completions, well completions will not track the rotary rig count on a concurrent basis.

In the offshore regions, it is often deemed economically desirable to plug discovery wells drilled with mobile units and to subsequently drill development wells from a fixed platform. Under these circumstances, the actual discovery wells are counted as dry holes since the wells were plugged and abandoned. Therefore, caution should be exercised in utilizing data on offshore exploratory wells (Tables II and IV-A quarterly and Table V annually) to determine the number of newly discovered fields.

In order to provide the users of these data with more information, a supplemental survey was made of these offshore operators for whom dry new-field wildcats were reported to the API-AAPG Drilling Statistics Program during 1984. These operators were asked to identify those wells which could be classified as new-field discovery wells. For the purposes of this survey a new-field discovery is defined as follows:

> A new-field discovery well is defined as the first well drilled on a structural feature and/or stratigraphic condition that indicates the presence of a commercially significant quantity of hydrocarbons which may be produced. The discovery may well be drilled and abandoned without being completed to produce.

Supplementary information was requested on 303 offshore new-field wildcat wells listed as dry holes. Responses were received for 205 wells. Of these 205 wells, 6 were classified as new-field discoveries, according to the definition given above. These discovery wells were distributed as follows:

| | |
|---|---|
| 1 Oil—Offshore Louisiana | 2 Gas—Offshore Louisiana |
| 2 Oil—Gulf of Mexico-North | 1 Gas—Offshore Texas |

Definitions used for the compilation of drilling statistics may be found in API Technical Report No. 1, "Standard Definitions for Petroleum Statistics," Third Edition, 1981. Users of drilling statistics may also be interested in the publication entitled "Instructions for Completing Individual Well Tickets for U.S. Drilling Statistics," Second Edition, January 1, 1972. The publications are available from the American Petroleum Institute in Washington, D.C.

Additional descriptive information as well as maps outlining the various state and federal offshore areas is published in API Bulletin D12A, "The API Well Number and Standard State and County Numeric Codes including Offshore Waters," reissued May 1982. This publication is available from the API Production Department, 211 North Ervay, Suite 1700, Dallas, Texas 75201.

1. DATA ARE PRELIMINARY AND SUBJECT TO POSSIBLE FURTHER REVISION.

2. DOES NOT INCLUDE STRATIGRAPHIC AND CORE TESTS OR SERVICE WELLS.

3. WELLS ARE CLASSIFIED BY DEPTH INTERVALS ON THE BASIS OF THE DEEPEST TOTAL DEPTH REPORTED FOR EACH WELL REGARDLESS OF THE TOTAL AMOUNT OF FOOTAGE DRILLED. FOR THE MAJORITY OF WELLS REPORTED, THE DEEPEST TOTAL DEPTH AND THE TOTAL FOOTAGE DRILLED ARE EQUAL. HOWEVER, FOR OLD WELLS DRILLED DEEPER AND FOR NEW WELLS SIDETRACKED OUT OF AN ORIGINAL HOLE TO A NEW BOTTOM-HOLE LOCATION, THE TOTAL FOOTAGE DRILLED WILL BE LESS THAN THE DEEPEST TOTAL DEPTH.

1. DATA ARE PRELIMINARY AND SUBJECT TO POSSIBLE FURTHER REVISION.

2. INCLUDES MULTIPLE COMPLETION WELLS WHICH PRODUCE GAS FROM ONE OR MORE ZONES BUT OIL FROM AT LEAST ONE ZONE. A MULTIPLE COMPLETION WELL IS COUNTED AS ONE WELL (SEE TABLES IV-A AND IV-B FOR DETAIL ON MULITPLE COMPLETION WELLS.)

3. INCLUDES MULTIPLE COMPLETION WELLS WHICH PRODUCE GAS FROM ALL ZONES. A MULTIPLE COMPLETION WELL IS COUNTED AS ONE WELL. GAS WELLS ALSO INCLUDE SO-CALLED CONDENSATE WELLS. (SEE TABLES IV-A AND IV-B FOR DETAIL ON MULTIPLE COMPLETION WELLS.)

1. DATA ARE PRELIMINARY AND SUBJECT TO POSSIBLE FURTHER REVISION.

2. INCLUDES MULTIPLE COMPLETION WELLS WHICH PRODUCE GAS FROM ONE OR MORE ZONES BUT OIL FROM AT LEAST ONE ZONE. A MULTIPLE COMPLETION WELL IS COUNTED AS ONE WELL (SEE TABLE IV-A FOR DETAIL ON MULITPLE COMPLETION WELLS.)

3. INCLUDES MULTIPLE COMPLETION WELLS WHICH PRODUCE GAS FROM ALL ZONES. A MULTIPLE COMPLETION WELL IS COUNTED AS ONE WELL. GAS WELLS ALSO INCLUDE SO-CALLED CONDENSATE WELLS. (SEE TABLE IV-A FOR DETAIL ON MULTIPLE COMPLETION WELLS.)

3. INCLUDES MULTIPLE COMPLETION WELLS WHICH PRODUCE GAS FROM ALL ZONES. A MULTIPLE COMPLETION WELL IS COUNTED AS ONE WELL. GAS WELLS ALSO INCLUDE SO-CALLED CONDENSATE WELLS. (SEE TABLES IV-B FOR DETAIL ON MULTIPLE COMPLETION WELLS.)

4. PRIOR YEAR WELL AND FOOTAGE DATA MAY NOT CORRESPOND TO THOSE PREVIOUSLY PUBLISHED. THESE DATA ARE FINAL FOR THE PERIOD AND REFLECT ANY REVISIONS MADE DURING THE YEAR TO THOSE ORIGINALLY PUBLISHED.

1. DATA ARE PRELIMINARY AND SUBJECT TO POSSIBLE FURTHER REVISION.

2. DOES NOT INCLUDE STRATIGRAPHIC AND CORE TESTS OR SERVICE WELLS.

3. WELLS ARE CLASSIFIED BY DEPTH INTERVALS ON THE BASIS OF THE DEEPEST TOTAL DEPTH REPORTED FOR EACH WELL REGARDLESS OF THE TOTAL AMOUNT OF FOOTAGE DRILLED. FOR THE MAJORITY OF WELLS REPORTED, THE DEEPEST TOTAL DEPTH AND THE TOTAL FOOTAGE DRILLED ARE EQUAL. HOWEVER, FOR OLD WELLS DRILLED DEEPER AND FOR NEW WELLS SIDETRACKED OUT OF AN ORIGINAL HOLE TO A NEW BOTTOM-HOLE LOCATION, THE TOTAL FOOTAGE DRILLED WILL BE LESS THAN THE DEEPEST TOTAL DEPTH.

**APPENDIX C**

**SUSPENSE WELL REPORT**

## APPENDIX C

## SUSPENSE WELL REPORT

At the end of each report year a number of wells remain in a "suspense file." These are wells which have been drilled to total depth and operations suspended (the rig released) without making a completion, either as a producer or a dry hole. Because some of the information necessary to complete the well ticket is not available, these wells cannot be entered into the data system. As the information becomes available, these wells will be reported into the current year's data file.

There are a number of reasons why the wells are being held in suspense, the major ones being: (1) waiting on tight hole release; (2) waiting on production tests; (3) waiting on the completion of a platform drilling program; (4) waiting on the completion of production facilities; (5) waiting on the completion of transportation facilities; as well as a number of other reasons such as waiting on the evaluation of a well, temporary mechanical failures, sand problems, etc.

At the end of 1984 a total of 5,832 wells, exploratory and development, were in the suspense file in the following areas:

| State or District | Number of Wells |
|---|---|
| California | 6 |
| Colorado | 101 |
| Illinois | 31 |
| Kansas | 20 |
| Louisiana: | |
| North | 0 |
| Offshore & South | 35 |

TO: SUBSCRIBERS TO THE "QUARTERLY COMPLETION REPORT"

Enclosed is the first edition of the "Quarterly Completion Report." This replaces the "Quarterly Review of Drilling Statistics" (QRD), which was discontinued with the Fourth Quarter 1984 edition.

The "Quarterly Completion Report" (QCR) differs in many ways from the former quarterly report, foremost of which is the manner in which the well completions are reported for publication. The QCR will report well and footage information on the basis of the quarter in which the wells were completed, regardless of when they are reported to the API. (The QRD published this information based on the quarter in which the data were received.)

Some of the other changes from the QCR are:

- Estimated well completions and footage drilled for the current quarter and eight prior quarters are included. This issue also includes the 1982 estimates.

- Annual completion data are included for each of the three prior years, and present the well completion information by class of completion, including new-field wildcat completions.

- Well and footage data, for the total United States, is shown for onshore and offshore completions with the offshore information subdivided for state and federal waters.

- Well and footage statistics are provided showing the number of completions which were first reported for that quarter (year). These can be compared to those new reported for that quarter in order to gauge the time-lag affecting the drilling statistics.

Data users are encouraged to review the preface, text, and footnotes prior to using these data. The API welcomes any suggestions or comments on the data now included in the "Quarterly Completion Report." These should be addressed to the Drilling Statistics Section, American Petroleum Institute, 1220 L Street, N.W., Washington, D.C. 20005.

# Preface

In 1966, the American Association of Petroleum Geologists (AAPG) expanded its statistical program to include development drilling as well as exploratory drilling. Drilling data collected by the AAPG for wells drilled in 1966 were published monthly by *The Oil and Gas Journal,* and annual summaries were published by the AAPG.

During the years 1967–1969 the AAPG continued to compile the drilling statistics, which were published by the API in the *Quarterly Review of Drilling Statistics* (QRD) and annually in the AAPG *Bulletin.* In January 1970 the API assumed the responsibility for the collection and the publication of drilling statistics for the United States.

The data collection procedures used by the API are essentially the same as those originally developed by the AAPG. The United States is divided into 30 districts. For each district there is an API respondent responsible for reporting the initial well information to the API, either on an API well ticket or in a machine-readable format for direct computer entry. This information is edited for accuracy and completeness and entered into the API database for subsequent monthly and quarterly retrievals.

Each of the 30 districts also has a district Chairman of the AAPG's Committee on Statistics of Drilling (CSD) who is responsible for reviewing all well classifications reported to the API. He also classifies all exploratory wells according to the Lahee guidelines and provides additional geological information for exploratory wells.

During the years 1967 through 1984, the statistics presented in the QRD were for completed wells *reported* to the API during each quarter. They did not reflect the total number of wells actually completed during the quarter.

As drilling activity began to increase in the late 1970s and early 1980s, the time lapse between the quarter in which the wells were completed and the quarter in which the wells were included in the published data began to widen for reasons that were beyond the control of the API. In order to provide more useful information to the data-user community the manner of presenting the data was changed in 1985.

Beginning with the First Quarter 1985, the API *Quarterly Completion Report* (QCR) replaces the QRD. The data presented in this, and future, quarterly reports will classify wells according to the month they were completed as opposed to the month they were reported, as was done previously. (Additional information on the contents of the QCR are included in the text.)

Since the well and footage data are often reported with a significant time lag, the data for a given period will be subject to further change for some period in the future. Thus, to provide the data user with some measure of current activity, the QCR also will include quarterly estimates of total well completions and footage drilled. These estimates will be for the current quarter and eight prior quarters and represent API's best estimate of the total number and footage of wells actually completed in a given quarter.

The API also has prepared an historical compendium, *Well Completions and Footage Drilled in the United States, 1970–1982,* which provides information on the revised basis for the years prior to those included in the QCR.

Washington, D.C.
May, 1985

# The API Quarterly Completion Report

**Introduction.** As noted in the Preface, the API has revised its statistical reporting procedures for the quarterly drilling reports, effective with the First Quarter, 1985. Thus, the well and footage information included in the *Quarterly Completion Report* (QCR) are not comparable with the statistics published in the *Quarterly Review of Drilling Statistics* for the years 1967 through 1984. This series was discontinued with the Fourth Quarter 1984 issue.

The discontinued series presented the well and footage data on the basis of the quarter in which they were received by the API. Because of reporting delays, these data did not necessarily reflect the total number of wells actually completed during the period in which they were reported.

The new series of quarterly reports will categorize all wells in the quarter in which they were completed, regardless of when they were reported to API. As additional wells for a quarter are received, they will be added to the API database and published in subsequent reports.

Acknowledging the fact that the reporting time-lag will continue to affect the well data, regardless of the manner of presentation, the API also will include estimates of total well completions.

Further information on the time lag affecting the well data; the revised tabular presentations; and the drilling estimates are contained in the sections which follow.

**The Time Lag.** The time lag, referred to here, is the number of months between when a well is completed and when it is reported to the API. The time lag is not uniform throughout all reporting districts and tends to vary as the level of drilling activity changes. However, on average, 63% of the wells are reported within three months of when they are completed and 90% are reported within 12 months of when they are completed.

The table, "Annual Number of Oil and Gas Wells and Dry Holes: Revised Series vs. Reported Series," compares the number of wells as reported in the discontinued series (on the basis of the year reported) with the actual number of well completions categorized by the time of completion.

**The Reporting Format.** The tables presented in the *Quarterly Completion Report* (QCR) show the number of well completions for the quarter, based on the latest data reported to API. For example, the January through March, 1985 table shows the number of wells which have January through March completion dates, which the API received during the first quarter of 1985.

**Annual Number of Oil and Gas Wells and Dry Holes: Revised Series Vs. Reported Series**

| *Year* | *Number of Completions* | *Number of Wells Reported* |
|---|---|---|
| 1970 | 28,173 | 28,120 |
| 1971 | 26,268 | 25,851 |
| 1972 | 27,934 | 27,291 |
| 1973 | 27,692 | 26,592 |
| 1974 | 33,037 | 31,698 |
| 1975 | 38,884 | 37,235 |
| 1976 | 40,940 | 39,765 |
| 1977 | 45,855 | 44,982 |
| 1978 | 50,061 | 47,057 |
| 1979 | 51,890 | 49,816 |
| 1980 | 69,486 | 60,845 |
| 1981 | 89,234 | 78,538 |
| 1982 | 80,914 | 85,795 |

As additional completions are received for each quarter they will be included in subsequent revised quarterly reports. Thus, the April through June 1985 QCR will include a revised First Quarter 1985 table which will include January through March completions received by the API during the second quarter period.

The QCR will include both quarterly and annual tables. The quarterly tables present statistics for total well completions only. Separate tables are not shown for exploratory and development well completions. Under the new reporting procedures, insufficient state and area information is available for exploratory drilling to provide any useful information. However, separate U.S. totals for exploratory and development well completions are shown at the bottom of each quarterly table.

Annual tables are included in the QCR for two prior years. Separate tables are shown for total wells, exploratory wells, development wells, and new-field wildcat wells. These tables also will be revised on a quarterly basis to show additional reporting.

Well completions by depth interval are provided on a quarterly and annual basis. The quarterly tables include total completions only. The annual tables give the completions by depth range for the total United States and for exploratory wells as well as for onshore and offshore completions separately.

Each quarterly and annual table provides information on the number of completions and footage drilled

which were reported on these tables when they were first published. These data should give the data user guidance as to the time lag for each area as well as the extent of completeness of the more current data.

**Estimated Drilling Activity.** Information on well completions and footage drilled will be incomplete for the most recent quarters, due to the reporting lag. Therefore, to provide data users with a more useful measure of drilling activity, the QCR will publish estimated well and footage information for the current quarter and eight prior quarters.

Regression estimates will be made for well completions and footage drilled for total oil wells, gas wells, and dry holes, based on information currently included in the API database. The estimates will be further subdivided into five depth intervals. Separate estimates for exploratory and development drilling, for the total United States, also will be shown. The estimates will be revised each quarter, as more information is received, until it is determined that the maximum point of accuracy has been achieved.

However, caution should be exercised in using the estimates, particularly for the most current quarters. Although the estimating procedures demonstrate that these estimates achieve an acceptable level of accuracy, the degree of accuracy rises as more information for each quarter's activity becomes available.

The estimates are made by means of a series of multiple regression equations which utilize not only information on wells reported but on the changing lag structure as well. Changes in the reporting patterns are detected by the equation and estimates adjusted accordingly, based on the historical relationship between reporting patterns and well completions. As more data become available, the estimates are revised by means of additional regression equations that accommodate the new information.

The well and footage estimates are made independently on a disaggregated basis (that is, oil, gas, and dry wells and footage by depth category), then summed to produce estimated totals. These estimates of total activity have been found to attain the same level of accuracy as estimates made from the aggregated data directly.

Additional information on the estimating procedures may be obtained by writing to: Drilling Statistics, American Petroleum Institute, 1220 L Street N.W., Washington, D.C. 20005.

**Offshore Statistics.** In offshore areas, it is often considered to be economically desirable to plug discovery wells drilled from mobile units and subsequently, to drill development wells from a fixed platform. Under these circumstances, the actual discovery wells are counted as dry holes since the wells were plugged and abandoned.

Therefore, caution should be used in utilizing data on offshore exploratory wells to determine the number of newly discovered fields. The data referred to are included in the annual tables entitled "Total Exploratory Well Completions and Footage Drilled" and "New-Field Wildcat Well Completions and Footage Drilled."

**Definitions.** The definitions used for the compilation of drilling statistics may be found in API Technical Report No. 1, *Standard Definitions for Petroleum Statistics,* Third Edition, 1981. The publication is available from the Publications and Distribution Section, American Petroleum Institute, Washington, D.C.

Additional descriptive information as well as maps defining the various state and federal offshore areas of the United States also is available. The publication, API Bulletin D12A, *The API Well Number and Standard State and County Numeric Codes Including Offshore Waters,* reissued May 1982, may be ordered from the API Production Department, 211 North Ervay, Suite 1700, Dallas, Texas 75201.

*QUARTERLY COMPLETION REPORT:* **FOOTNOTES**

# Footnotes

## SECTION I:

### Estimated Well Completions and Footage Drilled

1. Estimated well completions and footage drilled are based on well information received by the API through March 29, 1985.

   These estimates are preliminary and subject to further revision. Additional information regarding these estimates can be found on page 2.

## SECTIONS II–V:

### Well Completions, By States and By Areas

1. The wells and footage shown are the cumulative number of wells residing on the API database for the quarterly or annual period indicated on the table. The well information included in this quarterly report is based on data received by the API through March 29, 1985.

   These data are subject to further revision as information is received by the API.

2. Includes multiple completion wells which produce oil from at least one zone, but may produce gas from one or more zones.

3. Includes multiple completion wells which produce gas from all zones. Gas wells also include condensate wells.

4. May include discovery wells in offshore regions. Please see "Offshore Statistics," on page 2.

   Footnote (4) is not applicable to the development well table.

5. The total number of wells and footage which initially were reported to the API during the period shown. Quarterly totals will not add to annual totals since additional information for a quarter will be received in later quarters and will be included in the annual totals.

6. Each of the states which is subdivided into an "offshore" area includes wells which were completed in both state and federal waters adjacent to those states. Wells reported under the subdivision "Offshore Federal Waters" are not duplicative of wells reported in the "offshore" areas shown with the respective states.

   Additional descriptive information as well as maps outlining the various state and federal offshore areas is published in API Bulletin D12A. Additional information regarding this publication is given on page 2.

### Well Completions, By Depth Interval

1. The wells and footage shown are the cumulative number of wells residing on the API database for the quarterly or annual period indicated on the table. The well information included in this quarterly report is based on data received by the API through March 29, 1985.

   These data are subject to further revision as information is received by the API.

2. Does not include stratigraphic and core tests and service wells.

3. Wells are classified by depth intervals on the basis of the deepest total depth reported for each well, regardless of the total amount of footage drilled. For the majority of wells reported, the deepest total depth and the total footage drilled are equal. However, for old wells drilled deeper and for new wells sidetracked out of an original hole to a new bottom-hole location, the total footage drilled will be less than the deepest total depth.

# Preface

In 1966, the American Association of Petroleum Geologists (AAPG) expanded its statistical program to include development drilling as well as exploratory drilling. Drilling data collected by the AAPG for wells drilled in 1966 were published monthly by *The Oil and Gas Journal,* and annual summaries were published by the AAPG.

During the years 1967–1969 the AAPG continued to compile the drilling statistics, which were published by the API in the *Quarterly Review of Drilling Statistics* (QRD) and annually in the AAPG *Bulletin.* In January 1970 the API assumed the responsibility for the collection and the publication of drilling statistics for the United States.

The data collection procedures used by the API are essentially the same as those originally developed by the AAPG. The United States is divided into 30 districts. For each district there is an API respondent responsible for reporting the initial well information to the API, either on an API well ticket or in a machine-readable format for direct computer entry. This information is edited for accuracy and completeness and entered into the API database for subsequent monthly and quarterly retrievals.

Each of the 30 districts also has a district Chairman of the AAPG's Committee on Statistics of Drilling (CSD) who is responsible for reviewing all well classifications reported to the API. He also classifies all exploratory wells according to the Lahee guidelines and provides additional geological information for exploratory wells.

During the years 1967 through 1984, the statistics presented in the QRD were for completed wells *reported* to the API during each quarter. They did not reflect the total number of wells actually completed during the quarter.

As drilling activity began to increase in the late 1970s and early 1980s, the time lapse between the quarter in which the wells were completed and the quarter in which the wells were included in the published data began to widen for reasons that were beyond the control of the API. In order to provide more useful information to the data-user community the manner of presenting the data was changed in 1985.

Beginning with the First Quarter 1985, the API *Quarterly Completion Report* (QCR) replaces the QRD. The data presented in this, and future, quarterly reports will classify wells according to the month they were completed as opposed to the month they were reported, as was done previously. (Additional information on the contents of the QCR are included in the text.)

Since the well and footage data are often reported with a significant time lag, the data for a given period will be subject to further change for some period in the future. Thus, to provide the data user with some measure of current activity, the QCR also will include quarterly estimates of total well completions and footage drilled. These estimates will be for the current quarter and eight prior quarters and represent API's best estimate of the total number and footage of wells actually completed in a given quarter.

The API also has prepared an historical compendium, *Well Completions and Footage Drilled in the United States, 1970–1982,* which provides information on the revised basis for the years prior to those included in the QCR.

Washington, D.C.
August, 1985

# The API Quarterly Completion Report

**Introduction.** As noted in the Preface, the API has revised its statistical reporting procedures for the quarterly drilling reports, effective with the First Quarter, 1985. Thus, the well and footage information included in the *Quarterly Completion Report* (QCR) are not comparable with the statistics published in the *Quarterly Review of Drilling Statistics* for the years 1967 through 1984. This series was discontinued with the Fourth Quarter 1984 issue.

The discontinued series presented the well and footage data on the basis of the quarter in which they were received by the API. Because of reporting delays, these data did not necessarily reflect the total number of wells actually completed during the period in which they were reported.

The new series of quarterly reports will categorize all wells in the quarter in which they were completed, regardless of when they were reported to API. As additional wells for a quarter are received, they will be added to the API database and published in subsequent reports.

Acknowledging the fact that the reporting time-lag will continue to affect the well data, regardless of the manner of presentation, the API also will include estimates of total well completions.

Further information on the time lag affecting the well data; the revised tabular presentations; and the drilling estimates are contained in the sections which follow.

**The Time Lag.** The time lag, referred to here, is the number of months between when a well is completed and when it is reported to the API. The time lag is not uniform throughout all reporting districts and tends to vary as the level of drilling activity changes. However, on average, 63% of the wells are reported within three months of when they are completed and 90% are reported within 12 months of when they are completed.

The table, "Annual Number of Oil and Gas Wells and Dry Holes: Revised Series vs. Reported Series," compares the number of wells as reported in the discontinued series (on the basis of the year reported) with the actual number of well completions categorized by the time of completion.

**The Reporting Format.** The tables presented in the *Quarterly Completion Report* (QCR) show the number of well completions for the quarter, based on the latest data reported to API. For example, the January through March, 1985 table, previously published, showed the number of wells which had January through March completion dates, which the API had received during the first quarter of 1985.

**Annual Number of Oil and Gas Wells and Dry Holes: Revised Series Vs. Reported Series**

| *Year* | *Number of Completions* | *Number of Wells Reported* |
|---|---|---|
| 1970 | 28,173 | 28,120 |
| 1971 | 26,268 | 25,851 |
| 1972 | 27,934 | 27,291 |
| 1973 | 27,692 | 26,592 |
| 1974 | 33,037 | 31,698 |
| 1975 | 38,884 | 37,235 |
| 1976 | 40,940 | 39,765 |
| 1977 | 45,855 | 44,982 |
| 1978 | 50,061 | 47,057 |
| 1979 | 51,890 | 49,816 |
| 1980 | 69,486 | 60,845 |
| 1981 | 89,234 | 78,538 |
| 1982 | 82,062 | 85,795 |

As additional completions are received for each quarter they will be included in subsequent revised quarterly reports. Thus, the April through June 1985 QCR includes a revised First Quarter 1985 table which includes January through March completions received by the API during the second quarter period.

The QCR will include both quarterly and annual tables. The quarterly tables present statistics for total well completions only. Separate tables are not shown for exploratory and development well completions. Under the new reporting procedures, insufficient state and area information is available for exploratory drilling to provide any useful information. However, separate U.S. totals for exploratory and development well completions are shown at the bottom of each quarterly table.

Annual tables are included in the QCR for two prior years. Separate tables are shown for total wells, exploratory wells, development wells, and new-field wildcat wells. These tables also will be revised on a quarterly basis to show additional reporting.

Well completions by depth interval are provided on a quarterly and annual basis. The quarterly tables include total completions only. The annual tables give the completions by depth range for the total United States and for exploratory wells as well as for onshore and offshore completions separately.

Each quarterly and annual table provides information on the number of completions and footage drilled

which were reported on these tables when they were first published. These data should give the data user guidance as to the time lag for each area as well as the extent of completeness of the more current data.

**Estimated Drilling Activity.** Information on well completions and footage drilled will be incomplete for the most recent quarters, due to the reporting lag. Therefore, to provide data users with a more useful measure of drilling activity, the QCR will publish estimated well and footage information for the current quarter and eight prior quarters.

Regression estimates will be made for well completions and footage drilled for total oil wells, gas wells, and dry holes, based on information currently included in the API database. The estimates will be further subdivided into five depth intervals. Separate estimates for exploratory and development drilling, for the total United States, also will be shown. The estimates will be revised each quarter, as more information is received, until it is determined that the maximum point of accuracy has been achieved.

However, caution should be exercised in using the estimates, particularly for the most current quarters. Although the estimating procedures demonstrate that these estimates achieve an acceptable level of accuracy, the degree of accuracy rises as more information for each quarter's activity becomes available.

The estimates are made by means of a series of multiple regression equations which utilize not only information on wells reported but on the changing lag structure as well. Changes in the reporting patterns are detected by the equation and estimates adjusted accordingly, based on the historical relationship between reporting patterns and well completions. As more data become available, the estimates are revised by means of additional regression equations that accommodate the new information.

The well and footage estimates are made independently on a disaggregated basis (that is, oil, gas, and dry wells and footage by depth category), then summed to produce estimated totals. These estimates of total activity have been found to attain the same level of accuracy as estimates made from the aggregated data directly.

Additional information on the estimating procedures may be obtained by writing to: Drilling Statistics, American Petroleum Institute, 1220 L Street N.W., Washington, D.C. 20005.

**Offshore Statistics.** In offshore areas, it is often considered to be economically desirable to plug discovery wells drilled from mobile units and subsequently, to drill development wells from a fixed platform. Under these circumstances, the actual discovery wells are counted as dry holes since the wells were plugged and abandoned.

Therefore, caution should be used in utilizing data on offshore exploratory wells to determine the number of newly discovered fields. The data referred to are included in the annual tables entitled "Total Exploratory Well Completions and Footage Drilled" and "New-Field Wildcat Well Completions and Footage Drilled."

**Definitions.** The definitions used for the compilation of drilling statistics may be found in API Technical Report No. 1, *Standard Definitions for Petroleum Statistics,* Third Edition, 1981. The publication is available from the Publications and Distribution Section, American Petroleum Institute, Washington, D.C.

Additional descriptive information as well as maps defining the various state and federal offshore areas of the United States also is available. The publication, API Bulletin D12A, *The API Well Number and Standard State and County Numeric Codes Including Offshore Waters,* reissued May 1982, may be ordered from the API Production Department, 211 North Ervay, Suite 1700, Dallas, Texas 75201.

# SECTION I:

## UNITED STATES DRILLING STATISTICS

## ESTIMATED NUMBER OF COMPLETIONS AND FOOTAGE DRILLED

## SUMMARY OF ESTIMATED COMPLETIONS: WELLS AND FOOTAGE, BY QUARTERS

### U. S. TOTAL: EXPLORATORY AND DEVELOPMENT WELLS[1]

| COMPLETION PERIOD | | OIL WELLS | | GAS WELLS | | DRY HOLES | | TOTAL WELLS | |

See Appendix A for Footnotes.

## *APPENDIX A*

### *QUARTERLY COMPLETION REPORT:* FOOTNOTES

# Footnotes

## SECTION I:

### Estimated Well Completions and Footage Drilled

1. Estimated well completions and footage drilled are based on well information received by the API through June 30, 1985.

   These estimates are preliminary and subject to further revision. Additional information regarding these estimates can be found on page 2.

2. The wells and footage shown are the cumulative number of wells residing on the API database for the quarterly and annual periods indicated on the table and include all wells received by the API through June 30, 1985.

## SECTIONS II–V:

### Well Completions, By States and By Areas

1. The wells and footage shown are the cumulative number of wells residing on the API database for the quarterly or annual period indicated on the table. The well information included in this quarterly report is based on data received by the API through June 30, 1985.

   These data are subject to further revision as information is received by the API.

2. Includes multiple completion wells which produce oil from at least one zone, but may produce gas from one or more zones.

3. Includes multiple completion wells which produce gas from all zones. Gas wells also include condensate wells.

4. May include discovery wells in offshore regions. Please see "Offshore Statistics," on page 2.

   Footnote (4) is not applicable to the development well table.

5. The total number of wells and footage which initially were reported to the API during the period shown. Quarterly totals will not add to annual totals since additional information for a quarter will be received in later quarters and will be included in the annual totals.

6. Each of the states which is subdivided into an "offshore" area includes wells which were completed in both state and federal waters adjacent to those states. Wells reported under the subdivision "Offshore Federal Waters" are not duplicative of wells reported in the "offshore" areas shown with the respective states.

   Additional descriptive information as well as maps outlining the various state and federal offshore areas is published in API Bulletin D12A. Additional information regarding this publication is given on page 2.

### Well Completions, By Depth Interval

1. The wells and footage shown are the cumulative number of wells residing on the API database for the quarterly or annual period indicated on the table. The well information included in this quarterly report is based on data received by the API through June 30, 1985.

   These data are subject to further revision as information is received by the API.

2. Does not include stratigraphic and core tests and service wells.

3. Wells are classified by depth intervals on the basis of the deepest total depth reported for each well, regardless of the total amount of footage drilled. For the majority of wells reported, the deepest total depth and the total footage drilled are equal. However, for old wells drilled deeper and for new wells sidetracked out of an original hole to a new bottom-hole location, the total footage drilled will be less than the deepest total depth.
